

Tahoe Cigarette Disposal Program

Why cigarette butt canisters?

Cigarette butts are the top trash found in Tahoe. In 2018, more than 27,600 were collected in and around Lake Tahoe by League and community volunteers. It is time to change that drastic statistic!

What's wrong with cigarette butts?

Cigarette butts contain toxic chemicals that can leach into waterways, they do not biodegrade, are a threat to wildlife that ingest discarded butts and are a fire hazard.

How do I get a cigarette canister in front of my business?

The League to Save Lake Tahoe and the Tahoe Water Suppliers Association have a limited amount to distribute, free of charge. Contact the info. below to reserve yours today!
