

KEEP TAHOE BLUE SCHOOLS

Keep Tahoe Blue Schools is the League's youth education program to create the next generation of Lake Tahoe environmental stewards. The League connects local and visiting students with the Tahoe environment to foster a lifelong sense of appreciation, respect, and responsibility for Lake Tahoe. We do this by providing place-based lessons and hosting environmental science experiences in classrooms, virtually, and on field trips.

One of our 2023 activities brought our team to the Lake Tahoe School in Incline Village where we taught an aquatic invasive species lesson to third and fifth graders. The kids blew us away with how much they already knew! The teachers saw their students interest in our mission and asked if their classes could get further involved. We made plans for the kids to join us in canvassing local businesses to ask them to prevent a major source of beach litter by swapping their single-use plastic foodware with sustainable alternatives.

2023 BY THE NUMBERS

Continue offering field-based, hands-on programs through the South Tahoe Environmental Education Coalition.

Increase student participation in the League's range of volunteer programs and events.
